DISCOVER YOUR PASSION

**ENGLISH LANGUAGE DEVELOPMENT
ACTIVITY PROGRAM**

SUMMER 2021

A HOLISTIC, CHILD CENTERED EXPERIENCE

LET YOUR STUDENT'S
DISCOVER
THEIR
PASSION

WHAT WE DO & WHY WE DO IT

Our Discover Your Passion holiday programs provide school communities with year-round, holistic educational programs.

Our onsite programming offers a stimulating, high-quality educational experience for every student. From ages 5-11, participants enjoy a varied activity schedule which develops the whole individual, from skill acquisition to personal growth.

We ensure the high-quality of our programs through our three-step approach. **Expert educators** in each activity deliver **session-specific tailored curriculums** within **first-class facilities** using **appropriate teaching equipment**.

WHY DOES HAVING A PASSION MATTER TO US?

Passion means having a motivation and drive to achieve excellence. Having motivation and drive is critical to the future success and happiness of all children.

WHY WE'RE DIFFERENT

1 HOLISTIC TEACHING PROGRAM

Holistic learning is at the core of our program. We recognise the value that all types of learning play in the emotional, mental and physical development of a student.

As well as acquiring knowledge and skill, our holiday program is designed with a balanced schedule of activities which lets students develop communication skills, confidence to express their inner creativity and ideas, as well as learn to work together and also solve problems individually and as a group.

3 ENGLISH DELIVERY

Our programs will be delivered in English, with students learning from a mixed team of native and non-native English educators.

5 FIRST-CLASS TEACHING FACILITIES

We deliver our programs in house at your school which boast first-class training facilities. Our learning tools and equipment are carefully selected and age-appropriate to ensure students have the best experience for finding their passion.

2 PROFESSIONAL EDUCATORS

Our activities are led by passionate experts to guide students, maximise skill acquisition and learning and ensuring student safety.

We utilise the expertise of year-round professional educators who lead their chosen activity in the classroom. These teachers are often sourced from the partner school itself ensuring quality, trust and continuity. Professional coaches from PacificPine Sports deliver appropriate curriculums for sports training sessions.

4 CURRICULUM-BASED ACTIVITIES

All activities follow carefully designed curriculums that allow participants to grow and develop over the course of the program.

6 UNIQUE ACTIVITIES & EXPERIENCE

Our varied schedule appeals all types of students, from budding scientists to future athletes, there is something for everyone! The changing scenery of activity locations, from the classroom to the gym, keeps students stimulated, engaged and most importantly excited throughout the program.

HOW WE'RE STRUCTURED

OUR CLASSROOM SESSIONS ARE DELIVERED IN ENGLISH BY PROFESSIONAL EDUCATORS. THE SESSIONS ARE ACTIVITY-BASED, WHERE STUDENTS WILL TAKE ON A UNIQUE PROJECT EVERYDAY.

STEAM POWERED BY PLAYNOVATE

Playnovate's project-based learning challenges students to think, build and problem solve.

RECREATIONAL GAMES

Fun, diverse, and exciting games that develop problem-solving, collaboration, and other skills in a variety of learning-through-play settings.

ENGLISH LANGUAGE DEVELOPMENT

Our English Language Development program helps build confidence and proficiency for English as a Second Language students. Students will participate in a range of English-level appropriate activities including phonic development targeted towards improving English speaking and listening skills.

STEAM POWERED BY PLAYNOVATE

In collaboration with Playnovate, PacificPine Sports delivers a unique STEAM learning experience to students. Playnovate's STEAM lessons guide students to play and innovate at the same time. Each STEAM lesson includes hands-on projects while learning STEAM knowledge via a proven project based learning methodology adopted from the Next Generation Science Standard (NGSS). Students will learn science and engineering expertise and 21st century skills in critical thinking, communication, collaboration, creativity and problem solving.

All students are provided hands-on science kits for each lesson, promoting active problem-solving learning.

SAMPLE CURRICULUM

MONDAY

TUESDAY

WEDNESDAY

THURSDAY

FRIDAY
